

Springboard Retail is a cloud-based POS and retail management system designed by retailers, for retailers. Built with multi-store, omni-channel retailers in mind, the software allows retailers to service every customer the same way, no matter where or how they shop.

Springboard provides retailers with better control over sales and profitability by placing actionable real-time data in the hands of every person who needs it, from the C-suite to the store floor. With inventory management, unparalleled custom reporting, APIs, and portability across platforms and devices, Springboard Retail is easy-to-use, quick-to-start and revered by its users for making their jobs easier.

Order Management

Manage orders across all channels. Distributed order management makes it easy to optimize inventory, reaching customers where they shop.

Inventory Management

Transfers. Cycle counts. Point in time inventory values. Know exactly how much you own across stores and channels in real time.

Purchasing+Receiving

Build customized purchase orders that suit your business and use key features to enforce accuracy when shipments are received.

Customer Management

Drive sales with customer insight. Empower sales associates to provide exceptional customer service and drive sales higher.

Dashboards+Reporting

Use data to enhance productivity. Dashboard shows real time KPIs with comps. Easily generate detailed reports with any custom field.

Built in Flexibility

Use your hardware - PC, Mac, or iPad. Track sales, inventory, and the customer data unique to your business. Build custom integrations with our open API.

Retail Management

SWITCH FROM LEGACY POS

Legacy POS systems were designed before the internet. They're expensive, difficult to upgrade, and hard to maintain. Springboard offers a modern, powerful multi-store, omnichannel Retail Management Platform that's user-friendly and quick-to-start.

- Bring your customer and sales history with you
- Reduce IT expenses: no upgrades and hardware agnostic
- Cloud-based means real-time data anytime, anywhere, on any device.

SWITCH FROM CLOUD POS

Many cloud-based POS systems today were built to be payments devices - not designed to support multi-store retailers with complex needs. Springboard is designed to support all functions across the multi-store, omnichannel retail enterprise.

- See data across all channels
- Robust inventory and customer relationship management
- Collect data specific to your business with Springboard SmartFields®
- Key integrations with top retail platforms

GROW WITH OMNICHANNEL

Omnichannel can be complex and multi-directional which demands an agile POS solution, one that provides a seamless experience for both the retailer and customer across all channels. Springboard Retail is a dynamic hub for the modern retailer.

- Integrates with top ecommerce platforms, including BigCommerce, Shopify, Magento
- Provides real-time data and visibility across all channels
- Flexible pricing, scale up or down quickly and easily

Designed specifically for retailers.

FAQs

Why Springboard Retail?

Our system was designed by retailers, for retailers. We've walked in your shoes, lived your pain points, and built a POS solution from the ground up to solve them. Let's face it, retail today is competitive; to thrive you need a robust tool kit to drive profitability, productivity, and performance. Our cloud-based solution is flexible, easy-to-use and always up-to-date with critical features like multi-channel customer, inventory, and order management. Expensive upgrades become a thing of the past, and you can focus on leveraging our powerful reporting engine to know your business deeply.

Does I have to purchase new hardware when switching to Springboard Retail?

No! Because Springboard is web-based, you can use their existing hardware.

Can my data be transferred from my current POS to Springboard Retail?

Yes, we can easily migrate your data into Springboard, or you can import it yourself.

What is the cost of Springboard Retail?

Springboard Retail offers four tiers of pricing based on features, services, and support you need. Pricing starts at \$69 per month, per selling station. And there are no setup fees!

Does Springboard Retail cap store size? Could I grow from 10 to 150 stores?

Springboard was built as an API first software. This allows Springboard retailers to easily scale locations, users and SKUs.

How does Springboard integrate with other retail platforms?

We designed our cloud-based retail POS system specifically to integrate with other top retail technology platforms including BigCommerce, Shopify, Magento, Mailchimp, Thirdshelf, Joor and many more. Springboard Retail also comes equipped with a comprehensive REST/JSON API and a JavaScript API to allow retailers to develop their own custom integrations.
